SUMMARY

Motivated and detail-oriented MSc Biotechnology graduate with hands-on experience in molecular biology, genetic techniques, and bioinformatics, gained through academic projects, clinical laboratory work, and an internship at Biograd, UK. Proficient in PCR (RT-PCR, qPCR), ELISA, Western blotting, and DNA/RNA extraction, with strong competence in biostatistical analysis and scientific data interpretation. Demonstrated ability to conduct gene annotation, protein quantification, and microbial assays in GMP-compliant environments. Adept at working collaboratively in fast-paced lab settings, maintaining high standards of laboratory safety, quality control, and regulatory compliance. Passionate about applying innovative biotechnological approaches to advance healthcare and pharmaceutical research.

EDUCATION

MSc in Biotechnology | University of Chester, United Kingdom | 2023 – 2024

- **Modules:** Molecular Biology, Biochemistry, Bioprocess Engineering, Bioprocessing & Biomanufacturing, Immunology
- **Dissertation:** Metagenomic and Dynamic Analysis to Profile Microbial Diversity and Methanogenesis Genes in Biogas Bioreactors.

BSc in BioTechnology, Chemistry, Microbiology | MS Ramaiah College of Arts, Science and Commerce, India | 2019 – 2022

- **Modules:** Microbiology, Chemistry, Analytical Techniques, Applied Biotechnology

WORK EXPERIENCE

Biotechnology Intern | Biograd | February 2025 – March 2025 | Liverpool, UK

- Performed **DNA/RNA extraction and PCR/qPCR** on clinical samples with strict adherence to data integrity and traceability.
- Executed analytical assays, including **ELISA and electrophoresis**, while maintaining aseptic conditions and contamination control.
- Upheld **GMP standards and SOP compliance** to ensure "Right-First-Time" execution in daily laboratory operations.
- Managed **GMP documentation** and controlled records to maintain audit-readiness and support quality investigations.

Laboratory Assistant – Clinical Diagnostics | Apollo Hospital | November 2022 – January 2023 | Bangalore, India

- Processed 50+ biological samples weekly under strict **GMP conditions**, ensuring better accuracy, consistency, and regulatory compliance.
- Executed **RNA/DNA extraction, microarray, and ELISA** assays to support critical diagnostic testing and clinical workflows.
- Resolved assay inconsistencies by analyzing data trends and conducting repeat testing to ensure data integrity and audit-readiness.

Research Assistant | MS Ramaiah College | December 2021 – June 2022 | Bangalore, India

- Conducted biotechnology research projects, including analysis of new drug compounds and biological samples.
- Supported clinical trial-related activities and contributed to experimental design.
- Performed laboratory experiments, collected and analysed data, and compiled technical reports.

EXTRACURRICULAR ACTIVITIES

- Demonstrated teamwork and civic commitment through NSS volunteering, specifically coordinating **blood donation** drives and environmental cleanliness campaigns.
 - Managed tech event coordination to increase student participation while completing certified training in **GMP, Pharmacovigilance, and Clinical Research** to align with industry regulatory standards.
-

LANGUAGES, SKILLS AND CERTIFICATES

- **Languages:** English (advanced), Hindi (Fluent), Kannada (Native), Tamil (Intermediate)
 - **Skills:** Molecular Diagnostics(DNA/RNA), Analytical Techniques, ELISA, Data Analysis, SQL, Power BI.
 - **Certifications:** Power BI: Dashboards for Beginners, SQL for Healthcare Professionals.
